product range

LIDFILM SERIE 02

Solvent-less film made of PA/PE

Ideal to seal on PE trays

Thanks to its PA layer, it guarantees a minimum level of oxygen barrier

Peelable version available, as well with anti-fog and anti-UV

Great anti-perforation properties thanks to its PA layer

LID SERIE 03

Solvent-less film made of PET/PE

Excellent film for sealing and thermoforming PE trays

Peelable version available, as well with anti-fog and anti-UV

Pasteurizable version available

Film suitable for printing

BOTTOM SERIES

Multi-layer films ideal for thermo-forming

Film made of different materials according to customer requirements, sealable on PE or PP

Different thicknesses available

Peelable version available

As well with anti-fog and anti-UV

Pasteurizable version available

COLD CUTS

product range

LIDFILM SERIE 04
